

Best Places Report for

Mila Kunis

14 August 1983

5:00 PM

Ivano-Frankovo, Ukraine

Introduction

Listed below are the best places in the geographic areas that you selected. The latitude and longitude of the place is also given. The latitude and longitude are helpful if you wish to confirm where the place is located. For example, there are several places in Panama with the name "San Miguel" and the latitude and longitude can be used to confirm the "San Miguel" referred to.

You selected the top 20 places in 10 categories in these geographic regions: United States.

Scores for a place range from zero to 1,000. A score above 800 is extremely strong. These are places where you have a very strong ability to attract situations related to the category. Even scores above 500 are very strong. Because the very best places in the geographic regions selected are shown, there may be many places with scores above 500. All of these places are excellent. Of course, the higher the score, the better, but any score above 500 is excellent.

Scores of about 250 to 500 are also excellent even though a score that is higher than scores within this range is even better. Combine the astrological information with what you know about the place. For example, if you are looking for better employment and a place that has lots of opportunities in the profession in which you are qualified to work and wish to work has a score of 300, this is an excellent place for you. The astrological influences do not supercede the realities of the place. You can look at it like this: given the potential of that place to be suitable, the astrological score for that place will tell you how much of that potential you have easy access to.

Scores of around 50 to 150 are about average. You do not have an extra "boost" in these places but what you are also not likely to run into unexpected problems in regards to the area of interest. Scores below 50 are weak and you tend to

have more difficulty achieving your goals in regards to the area of interest.

If your report has been produced for large geographic regions, then places with low scores are not given in the list of best places. If there are two or more places tied with the same lowest score on the list, all of these places are shown. For example, in a report with the top 100 places listed, all places with the same score as the hundredth place are also listed.

Your AstroLocality Report is based on the following astrological data:

Sun	21	Leo	11	Saturn	29	Lib	16
Moon	9	Sco	08	Uranus	5	Sag	04
Mercury	18	Vir	02	Neptune	26	Sag	38
Venus	7	Vir	16	Pluto	27	Lib	07
Mars	0	Leo	32	Asc	5	Sag	32
Jupiter	1	Sag	28	MC	1	Lib	12

Tropical Placidus Daylight Savings Time observed
